Equipment

Fleece filter bag	piece(s)	1
Waste container		■

■ included in the scope of supply.

Automatic dust emptying

- Regular automatic emptying of the RCV 5 dust container allows the robotic vacuum to clean autonomously for much longer.
- With no need to empty the RCV 5 dust container by hand, the user does not have to come into contact with dust and dirt.
- Because the robotic vacuum cleaner's dust container is emptied regularly, the suction power stays constantly high, which means great cleaning results every time with the RCV 5.

Fleece filter bag

- The filter bag reliably traps dust and dirt.
- The trapped dirt is disposed of easily and hygienically.
- When the filter bag is pulled out of the station, it automatically seals shut straight away. The dirt remains safely in the bag and dust is prevented from escaping when the bag is changed.

Integrated cable management

- The mains cable of the self-emptying station can be neatly wound up using the cable management system fitted on the back of the self-emptying station – no more tangled cables.

COMPATIBLE MACHINES
